

Big Data Infographics

Here is where this template begins

Big Data Infographics

46%

Mercury is the closest planet to the Sun

34%

Despite being red, Mars is a cold place

22%

Neptune is the farthest planet from the Sun

68%

Jupiter is the biggest planet of them all

Mercury

Mercury is the closest planet to the Sun

Mars

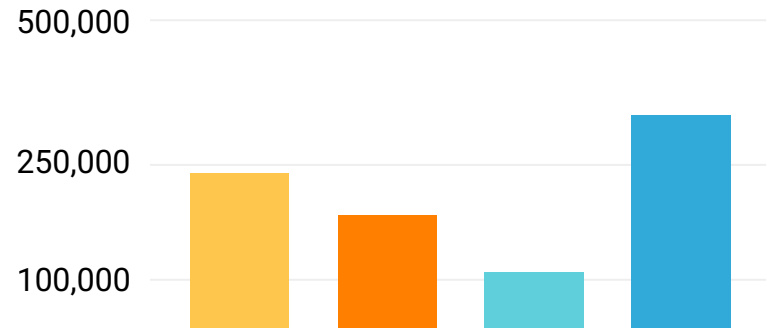

Despite being red, Mars is a cold place

Neptune

Neptune is the farthest planet from the Sun

Jupiter

It's the biggest planet in the Solar System

Big Data Infographics

Reduce costs

Venus has a beautiful name and is the second one from the Sun

Improve productivity

Mercury is the closest planet to the Sun and the smallest one

Attract new customers

Despite being red, Mars is a cold place full of iron oxide dust

New facilities/Geo expansion

Jupiter is a gas giant and the biggest planet in the Solar System

Big Data Infographics

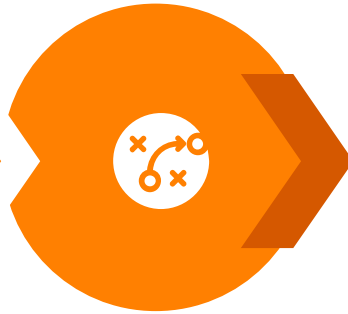

Big Data Infographics

Educate

Mercury is the closest planet to the Sun and the smallest one

Explore

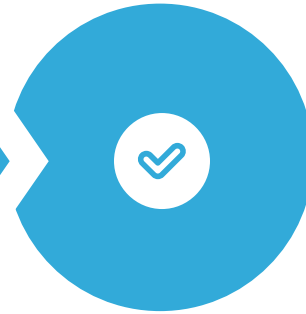

Despite being red, Mars is actually a cold place. It's full of iron oxide dust

Engage

Jupiter is a gas giant and the biggest planet in the Solar System

Execute

Mercury is the closest planet to the Sun and the smallest one

Big Data Infographics

75%

Mars

Mars is actually actually a cold place. It's full of iron oxide dust

60%

Saturn

Saturn is composed of hydrogen and helium and is the ringed one

50%

Mercury

Mercury is the closest planet to the Sun and the smallest one

Big Data Infographics

Data

Despite being red,
Mars is a cold place
full of iron oxide dust

01

02

Decision

Venus has a beautiful
name, but also very
high temperatures

03

Insight

Jupiter is a gas giant
and the biggest planet
in the Solar System

04

Info

Mercury is the closest
planet to the Sun and
the smallest one

Big Data Infographics

Data

Despite being red, Mars is a cold place. It's full of iron oxide dust

Insight

Mercury is the closest planet to the Sun and the smallest one of them all

Decision

Mars is full of iron oxide dust, which gives the planet its reddish cast

Info

Jupiter is a gas giant and the biggest planet in the Solar System

Big Data Infographics

Mars

Despite being red, Mars is actually a cold place. It's full of iron oxide dust

Jupiter

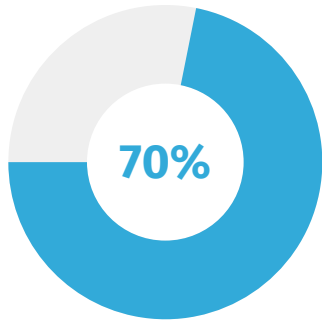

Jupiter is a gas giant and the biggest planet in the Solar System

Mercury

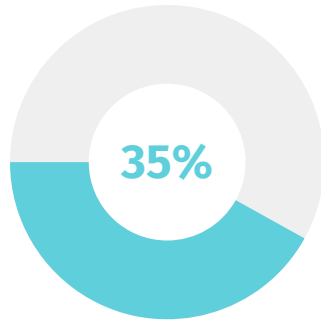

Mercury is the closest planet to the Sun and the smallest one

Big Data Infographics

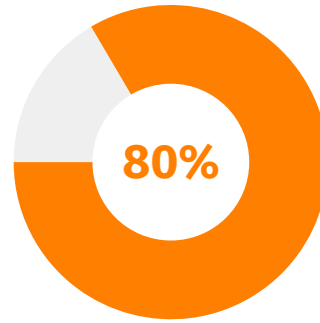

Mercury

Mercury is the closest planet to the Sun and the smallest one

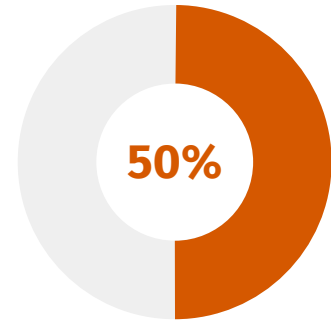

Mars

Despite being red, is actually cold and full of iron oxide dust

Jupiter

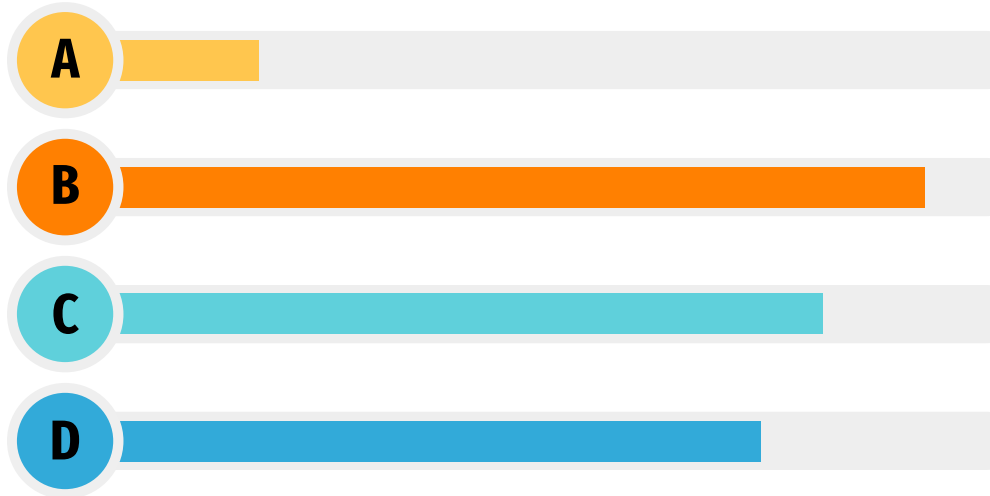

It's a gas giant and the biggest planet in the Solar System

Saturn

Saturn is composed mostly of hydrogen and also helium

Big Data Infographics

Mercury

Mercury is the closest planet to the Sun

Mars

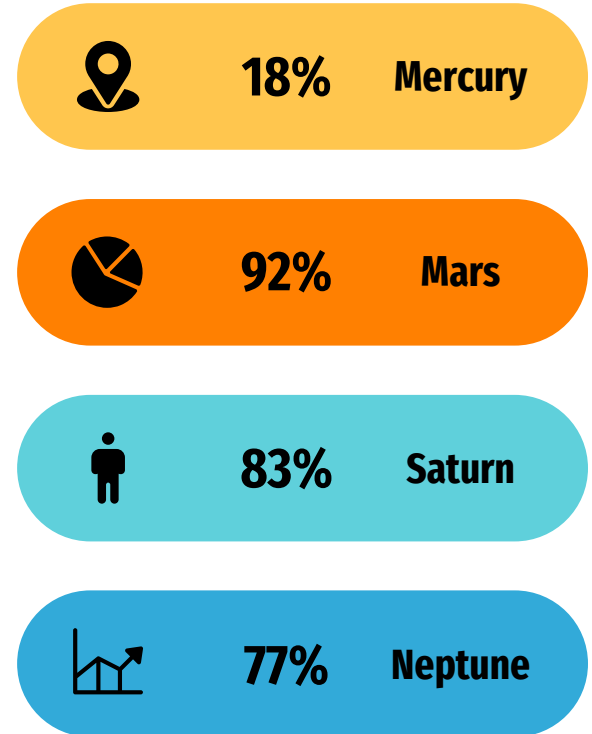

Despite being red, Mars is a cold place

Saturn

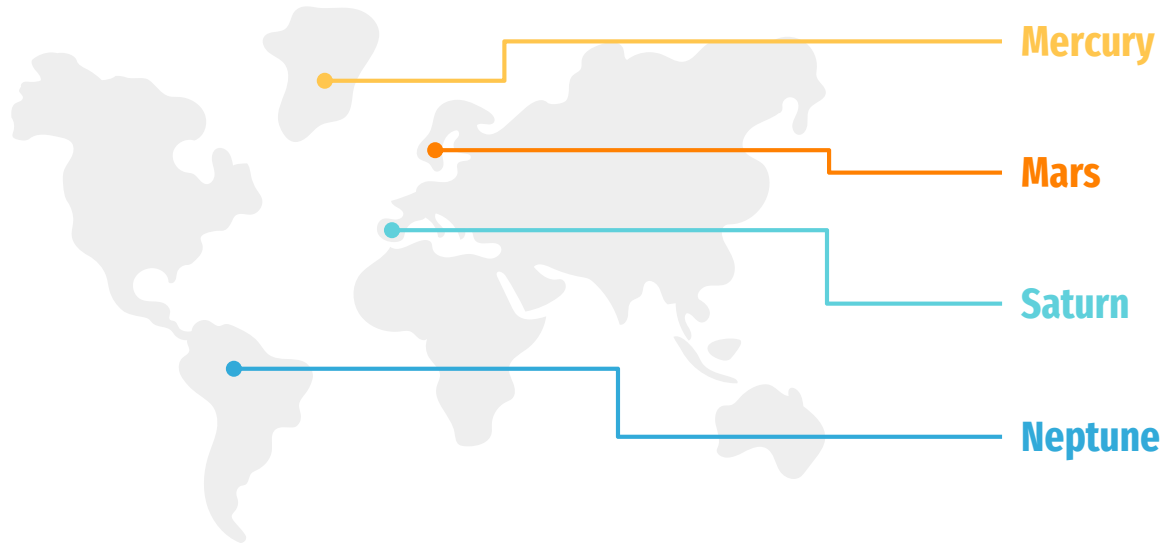

It's composed of hydrogen and of helium

Neptune

Neptune is the farthest planet from the Sun

Big Data Infographics

Mercury is the closest planet to the Sun

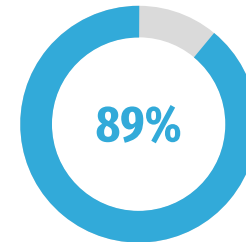

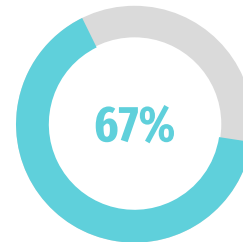

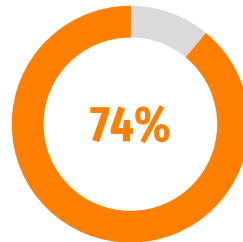

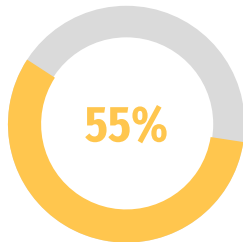

Despite being red, Mars is a cold place

It's composed of hydrogen and helium

It's the farthest planet from the Sun

Big Data Infographics

Data Risk

Data Security

Mercury is the closest planet to the Sun and the smallest

Data Quality

Despite being red, Mars is cold and full of iron oxide dust

Interpretation Risk

Model Risk

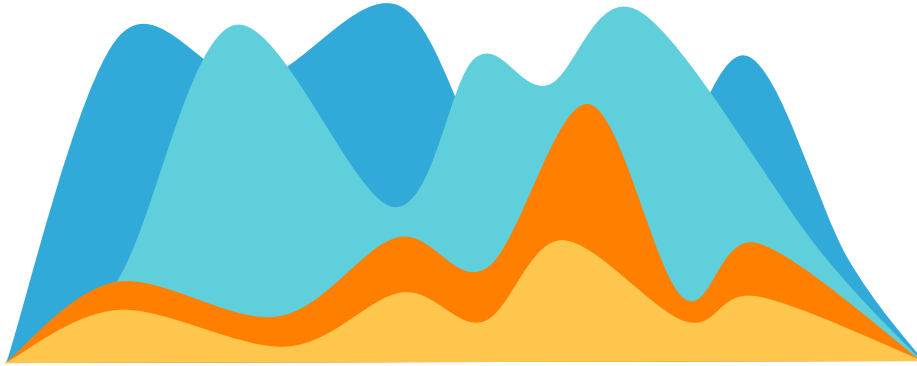

It's a gas giant and the biggest planet in the Solar System

Interpretation Risk

Saturn is composed mostly of hydrogen and helium

Big Data Infographics

Venus

Mars

Mercury

Jupiter

20%

Venus has a beautiful name and is the second one from the Sun

40%

Mercury is the closest planet to the Sun and the smallest one

60%

Despite being red, Mars is a cold place full of iron oxide dust

80%

It's a gas giant and the biggest planet in the Solar System

Big Data Infographics

Mercury

Mercury is the closest planet to the Sun

Mars

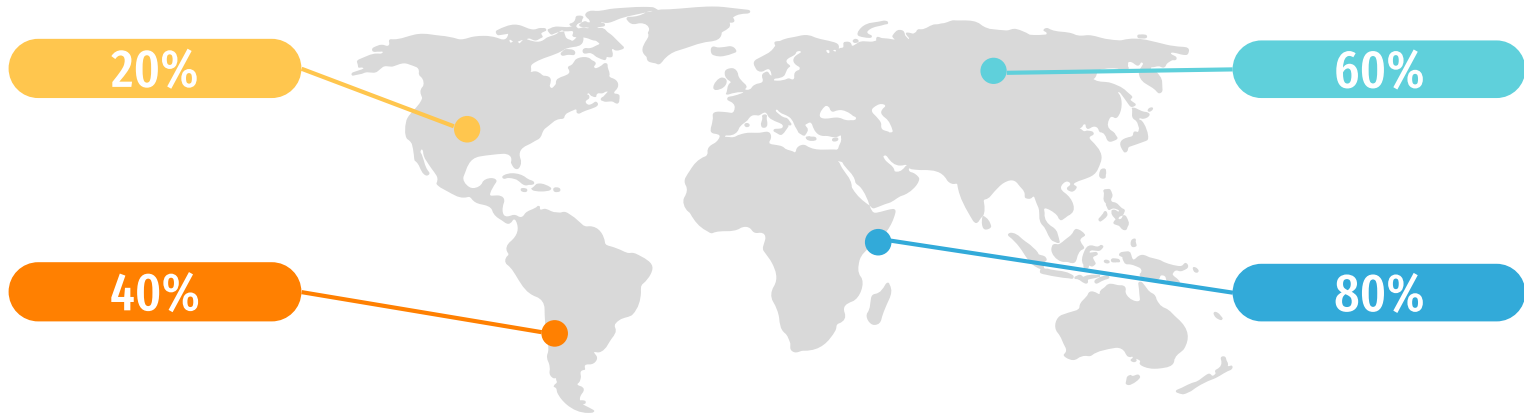

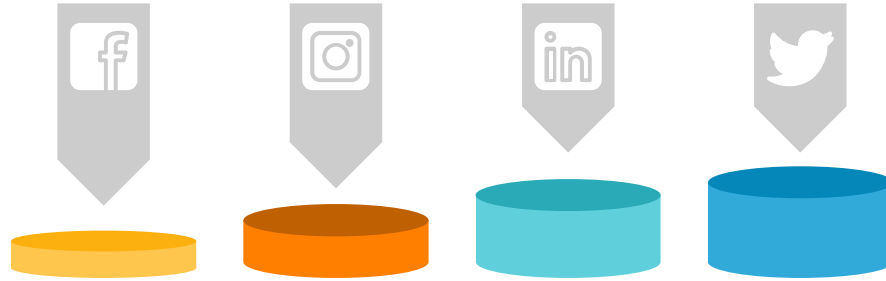

Despite being red, Mars is a cold place

Saturn

It's composed of hydrogen and helium

Neptune

Neptune is the farthest planet from the Sun

Big Data Infographics

Data

Saturn is a gas giant and has several rings

Big Data Infographics

Data interpretation

Mars is actually a cold place

Structured data

Jupiter is the biggest planet

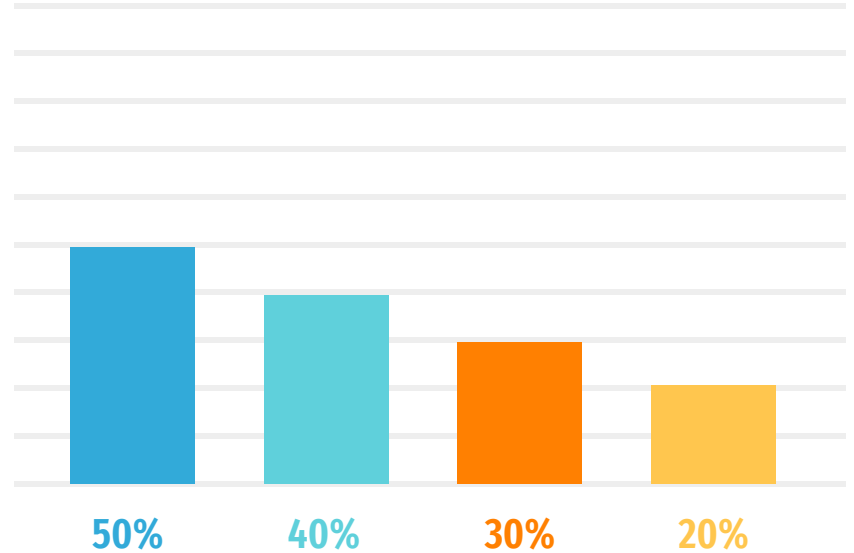

Geo expansion

Mercury is a small planet

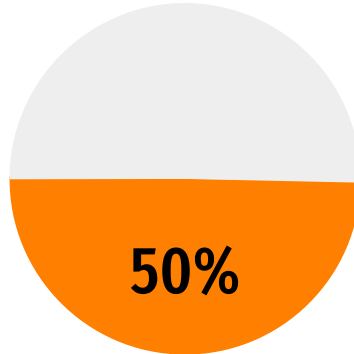

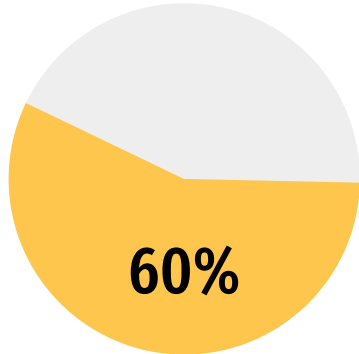

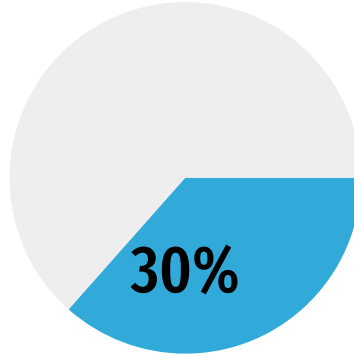

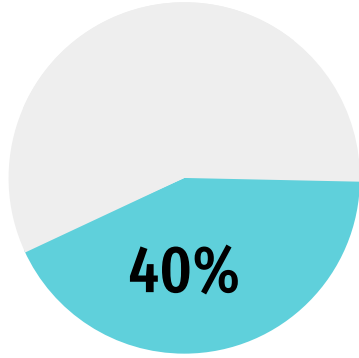

Variability

Neptune is far away from Earth

Big Data Infographics

Volume

Venus has a beautiful name and is the second one from the Sun

Variety

Mercury is the closest planet to the Sun and the smallest one

Veracity

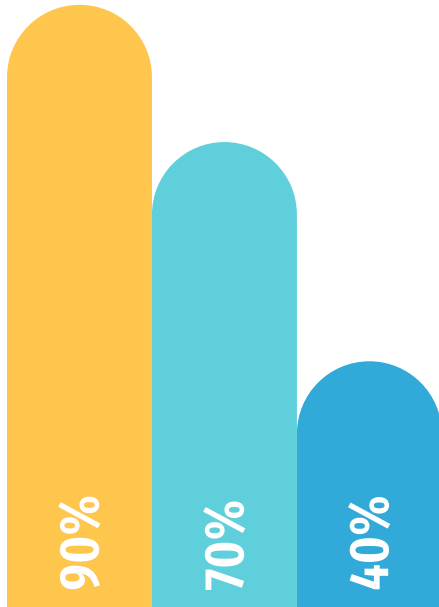

Despite being red, Mars is a cold place full of iron oxide dust

Value

Jupiter is a gas giant and the biggest planet of them all

Big Data Infographics

Insight 1

Mercury

Planet Mercury is the smallest one in the entire Solar System

Mars

Despite being red, Mars is actually a cold place full of iron oxide dust

Jupiter

Planet Jupiter is a gas giant and the biggest one in the Solar System

Saturn

Saturn is a planet composed mostly of hydrogen and helium, and has rings

Big Data Infographics

Low Volume

Mercury is the closest planet to the Sun

Batch

Despite being red, Mars is a cold place

Structured

Earth is the planet where we live on

High Volume

Jupiter is the biggest of them all

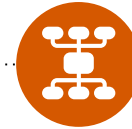

Real-Time

Venus is the second planet from the Sun

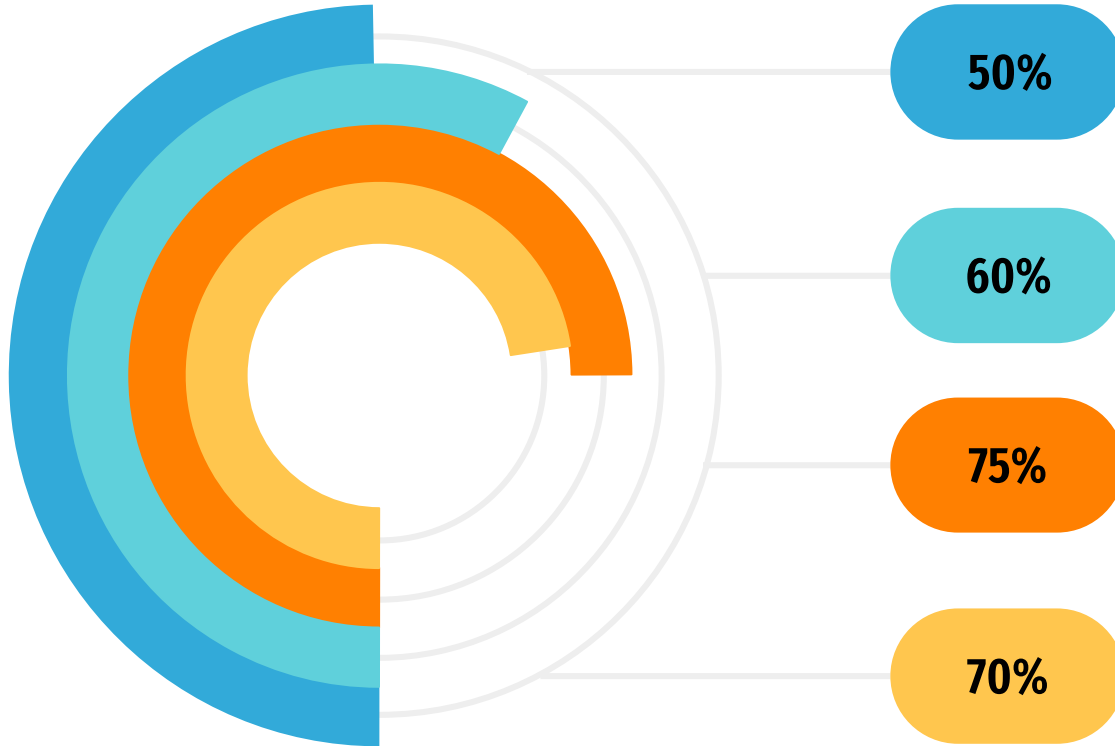

Multi-Structured

Saturn is the ringed one. It's a gas giant

Small Data
vs. Big Data

Big Data Infographics

Volume

Venus has a beautiful name and is the second one from the Sun

Variety

Mercury is the closest planet to the Sun and the smallest one

Veracity

Despite being red, Mars is a cold place full of iron oxide dust

Value

Jupiter is a gas giant and the biggest planet of them all

Big Data Infographics

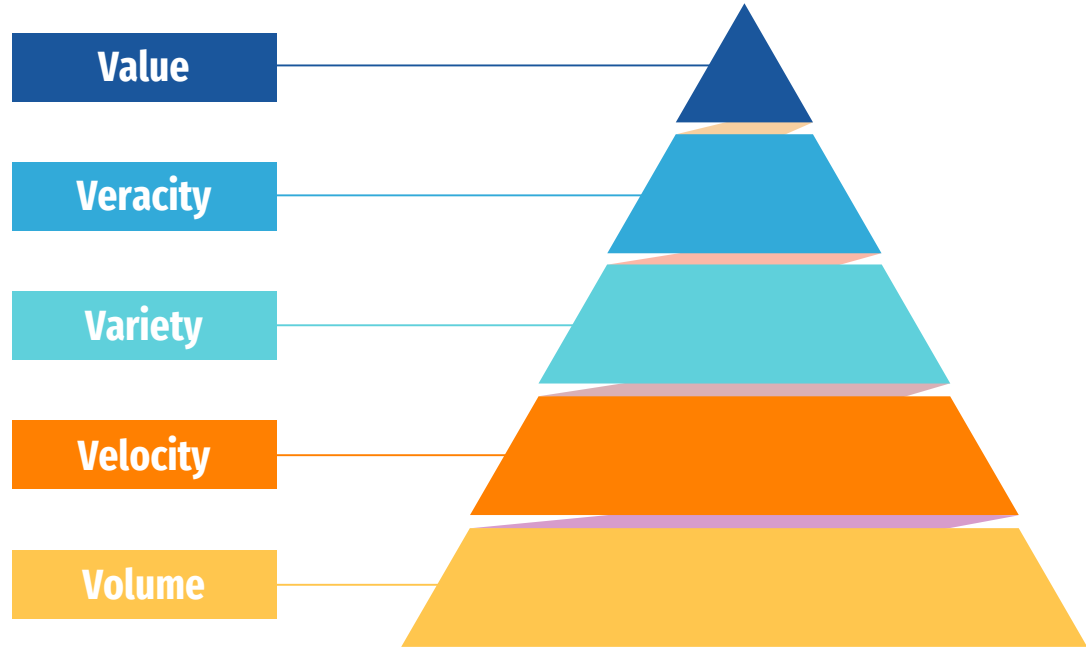

Despite being red, Mars is actually a cold place

Mercury is the smallest planet in the Solar System

Earth is the third planet from the Sun and the one with life

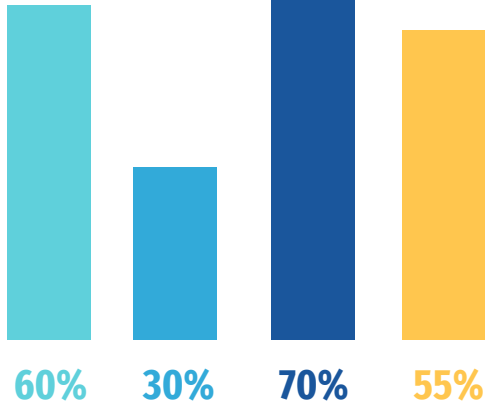

Neptune is the farthest planet from the Sun and a gas giant

Jupiter is a gas giant and the biggest planet of them all

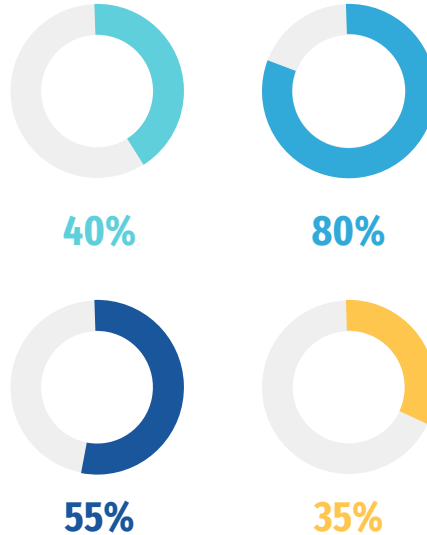

Big Data Infographics

Data 1

Data 2

01

Mercury is the smallest planet in the Solar System

02

Mars is actually a cold place, it's full of iron oxide dust

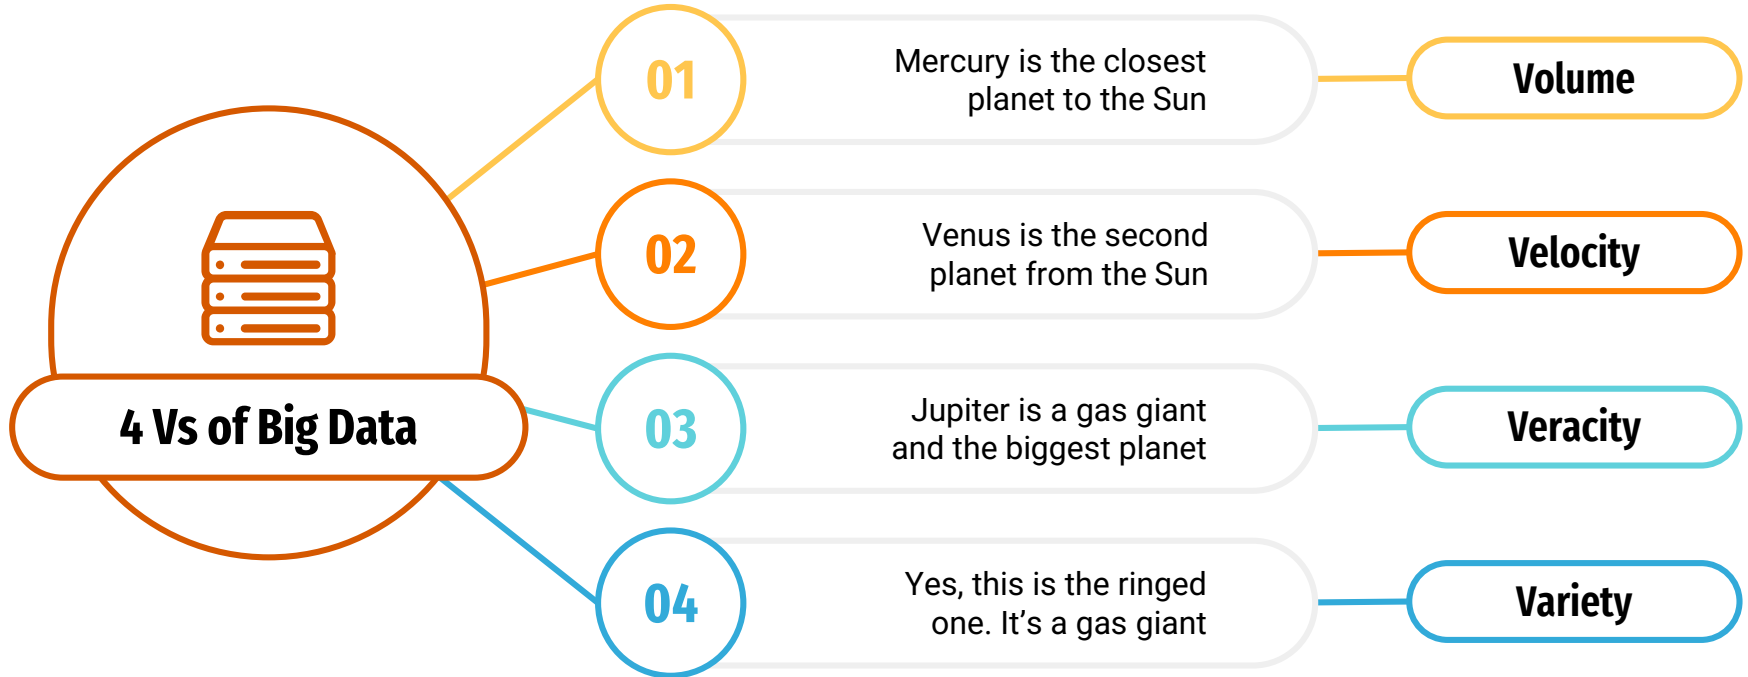

03

Jupiter is a gas giant and the biggest of them all
